

DECLARATION

LSEZ SIA "Jensen Metal"
Date: 06.11.2025

Declaration of Conformity with Toxic Substances Control Act

As required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, the Environmental Protection Agency (EPA) issued five final rules on January 6, 2021, to reduce exposures to certain Persistent, Bioaccumulative, and Toxic (PBT) chemicals. These rules have been subsequently revised, most notably for Phenol, Isopropylated Phosphate 3:1 (PIP 3:1), with the latest amendments effective as of late 2024.

These regulations limit or prohibit the manufacture (including import), processing, and/or distribution in commerce of the following PBT chemicals

- Decabromodiphenyl ether (DecaBDE)
- Phenol, Isopropylated Phosphate 3:1 (PIP 3:1)
- 2, 4, 6-tris(tert-butyl)phenol (2, 4, 6-TTBP)
- Hexachlorobutadiene (HCBd)
- Pentachlorothiophenol (PCTP)

LSEZ SIA Jensen Metal certifies that it is compliant with the requirements of TSCA regarding the five (5) PBT chemicals listed above and that none of the above-mentioned chemicals are intentionally used or added to our products.

Based on our due diligence and supplier information, we declare that none of these chemicals are intentionally added to our products. Furthermore, any unintentional presence of these substances, particularly PIP (3:1), is at a concentration below the 0.1% regulatory threshold established for articles. We maintain records to support our compliance and are committed to adhering to all applicable TSCA requirements.

Yours faithfully

Lars-Bo Christensen, CEO
